## Innovative Minds

Young Innovators of the S.S. Block, focused on science by putting up a display of their Intellectual Ideas on 11<sup>th</sup> July, 2015. Projects on Conservation of Energy and the use of Chemical, Tidal, Solar and Wind Energy were displayed. It was set up so as to provide a platform to students to gain first-hand knowledge on the various models made with hard work and expertise, hence, developing their scientific aptitude. It was surprising to see how innovative their minds were and how they thought "out of the box". We hope that in the future, they will continue their study and exploration of science.

Some models worth mentioning were:

Hydraulic jack - made by Radhika Raghav      Furniture made out of waste - by Prabhat Chhabra

Chemistry Energy Model - by Mehak Bhardwaj      Solenoid - by Arnav Khurana
